Ardhika

True and equal technology partner of choice

Ardhika Software Technologies Pvt. Ltd.

Open Source Technology Partners – true & equal

Web & Mobile applications

Web applications

- Document Management System & Workflow with decision nodes, custom attributes, automatic and parallel tasks
- Application to maintain hierarchical questions database with inter related food items, meal timings & nutrition info
- Call report database to record meeting discussion and follow up on action items
- Farmers text messaging system for preventive measures and farming tips

Mobile applications

- Connecting people with common interest in a locality – Android & iOS app
- Patient monitoring at home - iOS app
- App to survey patients diet pattern, collected data will be used for cancer studies – iOS app
- App to rate voluntary organizations in the UK – Android & iOS App

Project recovery

- Recovered a $1.5 million project by correcting design flaw, enhancing team technical and communication skills

---

"Professional, motivated hardworking & adaptable bunch of engineers, hard to find elsewhere…"- Prathap Chandran, Milna Studios, UK

Products

- **Visitor Pass** – enables visitors a hassle less entry for a prefixed appointment or event
- **ARCRUM** – Agile project management tool
- **Diet recall & Diet history** – a survey tool to record dietary patterns of subjects. Results are being used for cancer studies by leading Universities in the US

Corporate training clienteles

- NTT Data, Siemens ,HP, Target, Intuit, Ciber, Arbitron ,CDAC

Academy trainings

- Mahalingam College of Engineering & Technology, 3 Edge

Our Products and Services

Software product development - enterprise and mobile applications using

- Groovy/Grails, Node JS , Java, Spring, Hibernate
- Swift-iOS, Go, Android, Phonegap, Sencha Touch, Twitter Bootstrap
- MySQL, Mongo DB, Elastic search, Couch base, Redis
- Geographical Information System (GIS) web mapping application development using OpenLayers, GeoSever

Project recovery services for projects that has slipped schedule and incur huge cost

- Gap analysis - requirement, architecture
- Refactor architecture, design and code through review and audit
- Skill gap analysis & Team mentoring

Software quality audit during design phase

- Architecture, design and code

Corporate & Academic Training

- Groovy/Grails
